**RR = River Right RL = River Left**

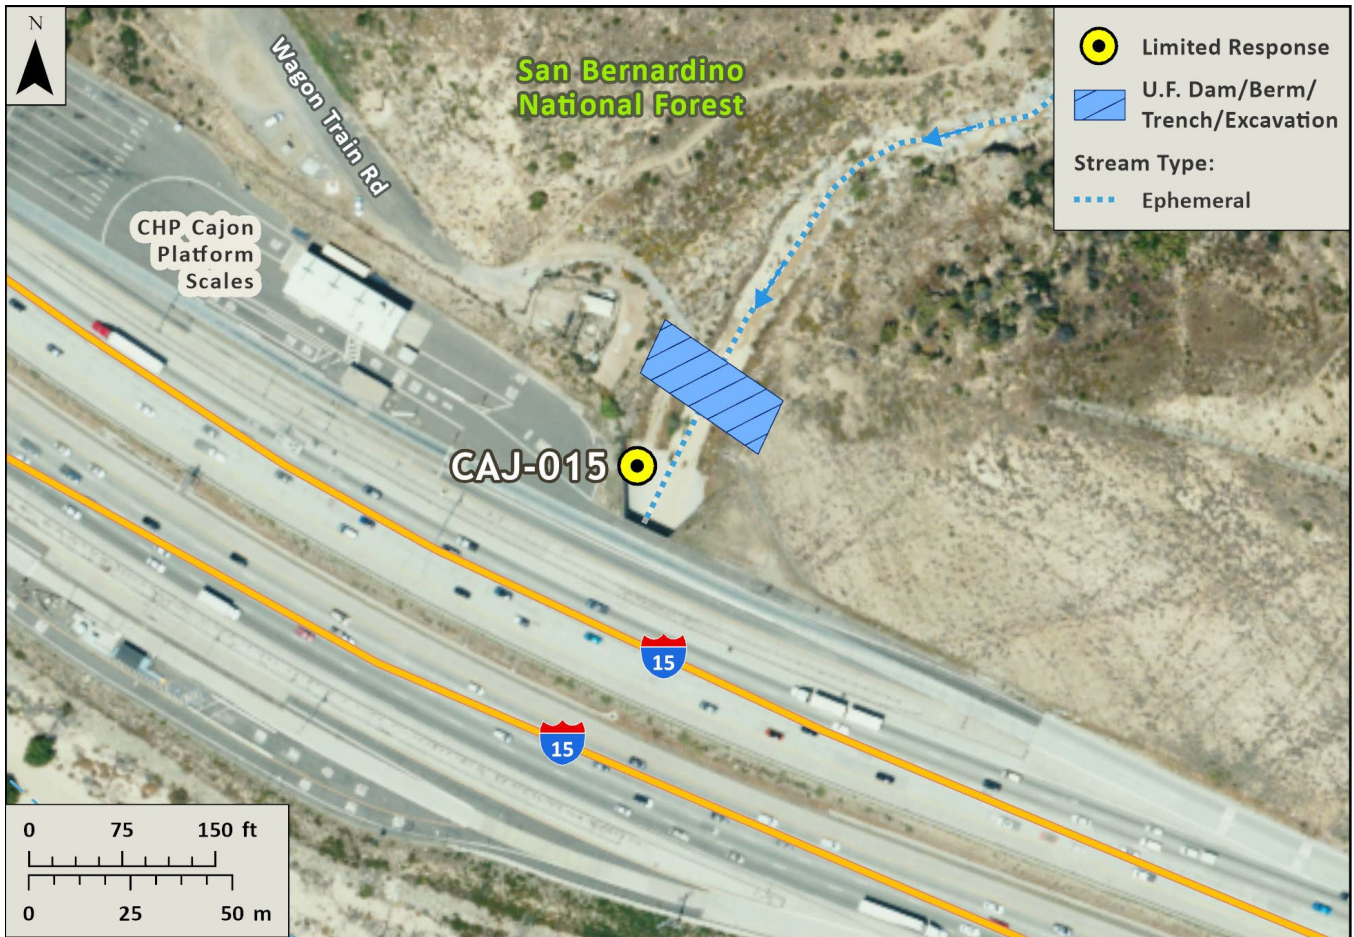

**Photo Date:** 12/28/2017

**Site Objectives:** Earthen berm/underflow dam to prevent further downgradient migration of oil and enable oil collection when surface water is present. Intercept trench or excavation to capture oil when surface water is absent.

**Implementation:** Minimize ingress and egress routes through vegetation to prevent erosion and disturbance of the surrounding ecosystem. Weather and water flows will determine specific site strategies.

**Staging Area Location and Capabilities/Amenities/Waste Management:** Small staging area with paved road down to the creek.

**Response Strategy Map (overview)**

**Table of Response Resources**

Type	Sub-Type	Size	Unit	Quantity	Special Equipment or Comments
Backhoe/ Excavator					For earthen berm/underflow dam or intercept trench/excavation
Piping					For earthen berm/underflow dam
