**Hazards, Restrictions and Advice for Responders**

- Responders should be aware of seasonal swift water concerns. See nearest gauge for flow information at: [CNRFC - Hydrology - River Guidance - Graphical RVF - SEIC1 \(noaa.gov\)](http://CNRFC-Hydrology-River-Guidance-Graphical-RVF-SEIC1.noaa.gov)
- Boat launches may become impacted/unusable during years with excess sediment load being transported downstream or inaccessible during high flow conditions.
- Toxic algal blooms have been known to occur during periods of warm weather and low river flow. Avoid water contact during these conditions. The following website tracks voluntary reporting of locations where toxic algal blooms have been reported: [https://mywaterquality.ca.gov/habs/where/freshwater\\_events.html](https://mywaterquality.ca.gov/habs/where/freshwater_events.html)

**Resources-At-Risk**

**Ecological:** Chinook Salmon, Coho Salmon, Pacific Lamprey, Klamath River Lamprey, Lower Klamath Marbled Sculpin, Northern Spotted Owl, Steelhead, Foothill Yellow-legged Frog, Siskiyou Mountains Salamander, Western Pond Turtle

**Economic:** Rafting guide services, fishing guide services, local tourism

**Tribal:** Contact the Native American Heritage Commission at (916) 373-3710.

**Cultural and Historic:** Contact the Northeast Information Center at (530) 898-6256.

**Site Description and Field Notes**

<p><b>Site Location/Segment:</b> KLA-SK-D-010</p>	<p><b>Site Description and Field Notes:</b> There is a graded gravel road that leads to the river's edge. USFS provides portable toilets for this area during the summer months. This is a popular wildlife viewing and rafting location with large parking lot but limited number of dispersed campsites. Elevation is at 1300 ft.</p>			
<p><b>Gradient:</b> Low to Medium</p>	<p><b>River Width:</b> 32.92 m (108 ft)</p>	<p><b>Vehicular Access:</b> All vehicle types can access this location.</p>	<p><b>Recreational Use:</b> Camping, fishing, rafting/kayaking, water contact.</p>	<p><b>Boat Launches:</b> Unimproved dirt boat launch located on-site. Raft, kayaks, or shallow draft vessels recommended.</p>
<p><b>Site Contact/s:</b></p>	<p>USFS – Klamath National Forest Happy Camp Ranger District (530) 493-2243</p>		<p>Karuk Tribe (530) 493-1600</p>	
<p><b>ESI Shoreline Type:</b></p>	<p>Mixed sand and gravel bars and gently sloping banks (5); Vegetated steeply sloping bluffs (8F)</p>

**RR = River Right RL = River Left**

**Photo Date:** 11/25/2019

**Site Objectives:** Deflection boom with product collection and shoreline protection.

**Implementation:** Start from river-left shoreline above boat launch and deploy 350 feet of swiftwater boom toward eddy at boat launch. Collect product with skimmer and pump directly to vacuum truck or tanks on shore. Deploy additional 200 feet of boom for shoreline protection.

**Staging Area Location and Capabilities/Amenities/Waste Management:** Stage equipment and manage wastes in large dirt parking area on-site.

**Response Strategy Map (overview)**

**Table of Response Resources**

Type	Sub-Type	Size	Unit	Quantity	Special Equipment or Comments
Boom	Swiftwater	8 to 12-in. skirt	Feet	550	Need ancillary equipment including anchors and stakes
Boom	Sorbent	5 to 8-in. dia.	Feet	1,100	
Pads and Sweep	Sorbent		Bale	40	
Skimmer	Disc or Drum			2	If needed
Response Vessel	Response and Boom Vessel			2	1 each, minimum. Kayaks, rafts, or shallow draft vessels recommended.
Personnel			Crew	6 to 10	2 vessel operators and 2 deckhands, minimum
Vacuum Truck		120	BBL	1	If needed
Storage Tank		20,000	Gallon	5	If needed
